SÍGUENOS EN   

MONDAY

1:30pm–4:30pm

Student and Early Career Professionals Roundtable

4:45pm–5:00pm

**Welcome and Introduction
Pepe Perelló, Conference and Technical Program Chair**

5:00pm–5:30pm

**Presidential Address
Doug Kirwin, SEG President**

5:30pm–7:30pm

Welcome Reception

REGISTRATION

Main Lobby, Sheraton Santiago Hotel

Sunday: 7:00am–7:00pm

Monday: 7:00am–6:00pm

Tuesday: 7:00am–6:00pm

Wednesday: 7:30am–5:00pm

Thursday: 7:30am–12:00pm

EXHIBITS and POSTERS

Levels 1 and -1

Tuesday: 8:30am–6:00pm

Wednesday: 8:30am–6:00pm

Thursday: 8:30am–4:00pm

SPEAKER READY ROOM

Cochrane Room

Tuesday–Thursday

7:30am–11:00am

1:30pm–5:00pm

Deliver flash drive to AV technician
10 minutes before session.

WIFI ACCESS

Network: Sheraton_Conference
Password: SEG2019

CORE SHACK - Quixote Room

Tuesday–Wednesday

8:30am–6:00pm

Thursday

8:30am–4:00pm

All sessions and events are at the Sheraton Santiago Hotel, except as noted for individual off-site events.

TUESDAY

8:15am–10:20am

Session 1:

Polymetallic Deposits and Metallogeny I

10:20am–11:00am

Break and Posters

11:00am–1:00pm

Session 1 (*cont.*)

1:00pm–2:20pm

Lunch

2:20pm–4:40pm

Session 2:

Polymetallic Deposits and Metallogeny II

Session 3:
New Discoveries in South America I

4:40pm–5:00pm

Break and Posters

5:00pm–6:10pm

ST1: Speed Talks

6:00pm–7:00pm

Reception and Poster Session

7:00pm–10:00pm

SEG Dinner and Awards Ceremony*
El Bohio Restaurant
Sheraton Santiago Hotel

WEDNESDAY

8:15am–10:20am

Session 4:

Copper Deposits and Metallogeny I

10:20am–11:00am

Break and Posters

11:00am–1:00pm

Session 4 (*cont.*)

1:00pm–2:20pm

Lunch

2:20pm–4:40pm

Session 5:

Copper Deposits and Metallogeny II

Session 6:
Applied Geomet

4:40pm–5:00pm

Break and Posters

5:00pm–6:10pm

ST2: Speed Talks

6:00pm–7:00pm

Reception and Poster Session

6:30pm–9:30pm

Industry Outlook Dinner*

Keynote Speaker:

John E. Black,
CEO and Director,
Regulus Resources, Inc.
Off-site at Restaurante
Vista Santiago, Cerro
San Cristobal

THURSDAY

8:15am–10:20am

Session 7:

Gold Deposits and Metallogeny I

10:20am–11:00am

Break and Posters

11:00am–1:00pm

Session 7 (*cont.*)

1:00pm–2:20pm

Lunch

2:20pm–4:40pm

Session 8:

Gold Deposits and Metallogeny II

Session 9:
New Discoveries in South America II

4:40pm–5:00pm

Break and Posters

5:00pm–6:00pm

Round Table

6:00pm–6:10pm

Introduction to SEG 2020

CONFERENCE ABSTRACTS

Available at www.segabstracts2019.org/schedule_public.php.

**PLEASE REFER TO THE ONLINE SCHEDULE OF EVENTS
FOR UPDATED INFORMATION!**

*Ticketed events

Bienvenidos! Welcome!

We welcome you to Santiago, Chile, and the SEG 2019 international conference!

This year's edition of SEG's international conference series is held for the second time in South America and the first time in Chile. The conference's broad theme, "**South American Metallogeny: Sierra to Craton,**" was conceived as an inclusive invitation to all explorers and researchers in the field of metallic mineral deposits of this rich and diverse continent. A wealth of studies on copper, gold, and polymetallic deposits, complemented by sessions on new discoveries and geomet, constitute the main thrust of the conference and, in conjunction with a team of expert colleagues from industry and academia, we have made sure that all regions of the continent are represented, together with studies from abroad. Other areas that impact exploration are included to showcase ongoing research and work on deposit types outside the main scope of the conference.

Although the focus on descriptive and conceptual geology exposes exploration practitioners to new and practical aspects of key deposit types of the continent and beyond, academic participants will benefit from cutting-edge talks by leading researchers in economic geology. The conference features an exceptional lineup of speakers, complemented by poster presentations, and an outstanding group of topical pre- and post-meeting field trips and workshops. In addition, we have included two sessions fully dedicated to students, with competitive speed talks selected from a wealth of geologic topics from most continents. Students, together with early-career professionals, will further participate in round table discussions with mentors to address key issues in managing a successful career in our occupation.

We thank our conference sponsors who have contributed greatly to making SEG 2019 a success. Their generosity especially facilitates student participation and programs.

On behalf of the Organizing Committee and all volunteers, we welcome you to Santiago's SEG 2019 conference. Enjoy it!

José Perelló, *SEG 2019 Conference and Technical Program Chair*
Brian Hoal, *Executive Director, Society of Economic Geologists*

Table of Contents

Student and SEG Early Career Professionals Round Table

1:30pm-4:30pm

Round Table Discussions
Open to students and
early career professionals

4:45pm-5:00pm

Welcome and Introduction

José (Pepe) Perelló, Conference and
Technical Sessions Chair

5:00pm-5:30pm

SEG Presidential Address

Douglas J. Kirwin, SEG President

5:30pm-7:30pm

Welcome Reception

Pre-Conference Field Trips

The IOCG Systems of the Carajás Province, Amazon Craton, Northern Brazil September 29–October 4

Leaders: Roberto Xavier, Gustavo Melo

Porphyry-Epithermal Ore Deposits of Northern Chile September 30–October 4

William X. Chávez, Jr.

Giant Porphyry Cu-Mo Deposits of the Miocene-Pliocene Age Farallon District: Examples from the Los Bronces, Andina (Rio Blanco), and Vizachitas Systems October 5

Tony Amberg, William X. Chávez, Jr.

Pre-Conference Workshops

Epithermal Polymetallic Deposits in the Porphyry System October 6
Lluís Fontboté, Université de Genève

Integrating Hyperspectral Technologies and Geochemistry Through the Mining Value Chain October 6
Sam Scher, Corescan; Federico Cernuschi, Eclectic Rock
Solace Hotel

Creation and Destruction of Permeability October 6
Richard Tosdal, Consultant

Epithermal Gold and Silver Deposits—Geology and Exploration October 7
Antonio Arribas, University of Texas, El Paso

Supergene Processes: Metals Mobility in the Weathering Environment October 7
William X. Chávez, Jr., New Mexico Institute of Mining and Technology

Exploration for Skarn Deposits October 7
Larry Meinert, Consultant

In a world of rapid change, the future belongs to those who can redefine it: innovators who embrace disruptive technologies and collaborate with a broad range of partners to solve real industry challenges.

Today, building on 100 years of technology and innovation leadership, we are taking a fresh approach to innovation.

FutureSmart Mining™ applies cutting-edge technological advances and broad innovative thinking to find safer, more efficient and more sustainable ways to mine the metals and minerals that the world needs.

We connect people to find solutions and pioneer the future of mining.

At Anglo American, we are redefining our future – today.

**AT ANGLO AMERICAN, WE ARE
RE-IMAGINING MINING
TO IMPROVE PEOPLE'S LIVES**

Real Mining. Real People. Real Difference.

Technical Program

Day 1 — Tuesday, October 8, AM

Oral Session 1

Polymetallic I

Session Co-Chairs: Lena Monteiro, Enrique Garay

8:15am-8:30am	Introduction <i>Lena V. Soares, Enrique Garay</i>
8:30am-9:00am	Polymetallic (Pb-Zn-Ag-Sn) deposits in South America <i>Luis Fontboté (Invited Speaker)</i>
9:00am-9:20am	The Paleoproterozoic Volcanogenic Massive Sulfide Deposit of Aripuanã, Amazonian Craton, Northern Brazil <i>Julio Souza Santos</i>
9:20am-9:40am	New Exploration Ideas for the Ayawilca Zinc-Silver-Indium-Tin Property, Central Peru <i>Alvaro Fernandez Baca</i>
9:40am-10:00am	The Zn-Pb Supergene Nonsulfide Ores in Peru: Examples from the Cuzco and Bongará Regions <i>Maria Boni</i>
10:00am-10:20am	The Cerro Lindo VMS Deposit, Peru <i>Jonas Mota e Silva</i>

10:20am-11:00am Refreshment Break and Poster Viewing

11:00am-11:40am **What Can the Chemistry of Magnetite Tell Us About the Origin of Magnetite-Apatite Deposits?**
John Hanchar (SGA Lecturer)

11:40am-12:00pm **The Proterozoic Vazante-Paracatu Zinc (-Lead) District, Minas Gerais, Brazil: Basin Evolution, Fluid Flow, and Base Metal Sulfide and Silicate Deposits**
Gema Olivo

12:00pm-12:20pm **Exploration and Geology at the VMS Zn-Pb Deposit of Palma Within the Uppermost Cretaceous Volcano-Plutonic Arc in Central Peru**
César Farfán

12:20pm-12:40pm **Indium in Bolivian Polymetallic Vein Mineralizations: Mineralogical Expression and Distribution in the Huari Huari and Ánimas-Chocaya-Siete Suyos Deposits**
Lisard Torró

12:40pm-1:00pm **Age Constraints and Isotope Signature of the Ediacaran Pb-Zn and Cu-Epithermal Deposits, Minas do Camaquã, Brazil**
Lucy Takehara Chemale

LUNCH BREAK

1:00pm-2:20pm **Lunch, Networking, Poster Viewing**

Day 1 — Tuesday, October 8, PM

Oral Sessions 2 and 3

Oral Session 2

Polymetallic II

Session Co-Chairs: Lena Monteiro, Enrique Garay

Carbonatite-Related Ore Formation Processes in Central Brazil

Pedro Cordeiro

2:20pm-2:40pm

2:40pm-3:00pm
The Genesis of the El Laco Iron Oxide-Apatite (IOA) Deposit in the Chilean Altiplano: Evidence from Fe, H, and Triple O Stable Isotopes
Adam Simon

3:00pm-3:20pm
The Economic Geology of Cobalt

Anthony Williams-Jones

3:20pm-3:40pm
Tourmaline as a Monitor of Magmatic-Hydrothermal Transition Processes at the World-Class San Rafael Sn Deposit, Peru
Matthieu Harlaux

Oral Session 3

New Discoveries in South America I

Session Co-Chairs: Alan Wilson, Juan Carlos Toro

Controls on Mineralisation at the Aurora Gold Mine

Boaz Wade

The Discovery of Silica Cap Au-Ag Veins, Cerro Negro Operations, Santa Cruz Province, Argentina
German Escorza

Genesis of the Giant Serra Verde Ion Adsorption REE Deposit, Brazil

Richard Herrington

Soledad: An Emerging High-Grade Copper-Gold-Silver Discovery Hosted in Tourmaline Breccia Pipes, Peru
David Kelley

3:40pm-4:00pm	<p>Do Organic Matter and Arsenic Promote or Prevent Gold Precipitation at the Shahuindo Epithermal Deposit (Cajamarca, Peru)? <i>Jean Vallance</i></p>	<p>Discovery and Evolving Geological Understanding of the Unique Falchani Volcanogenic Lithium Deposit, Macusani Plateau Area, Puno, Southeastern Peru <i>Ted O'Connor</i></p>
4:00pm-4:20pm	<p>Hydrothermal Paragenesis and Lifespan of the Haquira East Porphyry Copper Deposit, Southern Peru <i>Federico Cernuschi</i></p>	<p>The Discovery History and Geology of the Cascabel Project in Northern Ecuador <i>Santiago Vaca</i></p>
4:20pm-4:40pm	<p>Defining Criteria for the Distinction of Hydrothermal Alteration Zones Associated with Shallow and Intermediate Crustal Levels in the Carajás IOCG Southern Copper Belt <i>Angela Santos Costa</i></p>	<p>Discovery History and Geology of the Merian Gold Deposits, Suriname, South America <i>Santjitsing Radjikoemar</i></p>
4:40pm-5:00pm Refreshment Break and Poster Viewing		

Day 1 — Tuesday, October 8, PM**Speed Talk 1****Speed Talk 1****Session Chairs: Lisard Torró, Darryl Lindsay**

Poster no.

5:00pm-5:10pm	Introduction — <i>Lisard Torró, Darryl Lindsay</i>	
5:10pm-5:15pm	The Formation of High-Grade Gold Polymetallic Intermediate-Sulfidation Epithermal Veins in Santander and Bolívar Provinces, Colombia <i>Jocelyn Pelletier</i>	P.024
5:15pm-5:20pm	Mineralising Fluid Exsolution and Migration in Porphyry Systems: New Perspectives from the Yerington District, Nevada <i>Lawrence Carter (Student)</i>	P.102
5:20pm-5:25pm	Gold Re Concentration by High-Temperature Sulfide Recrystallization Supported by Re-Os Reset Ages: A New Mineralization Style for the Quadrilátero Ferrífero Area, Brazil <i>Mariana Brando Soares (Student)</i>	P.007
5:25pm-5:30pm	Can Zircon Trace Elements Correlate Whole-Rock Fertility Indicators for Porphyry-Copper Deposits? Application of a New Zircon Oxybarometer at El Teniente District <i>Gonzalo Henriquez (Student)</i>	P.068
5:30pm-5:35pm	Geology, Geochemistry, and Origin of the Watershed Scheelite Skarn Deposit, Northeast Queensland, Australia <i>Jaime Poblete (Student)</i>	P.145

5:35pm-5:40pm	Ore and Breccia Classification of the GW Orebodies of the Balatoc Diatreme, Acupan Gold Deposit, Philippines <i>Acer Jian Figueroa (Student)</i>	P.038
5:40pm-5:45pm	Sulfides Geochemistry of the Tiegelongnan Porphyry-Epithermal Cu Deposit, Tibet, China <i>Chao Yang (Student)</i>	P.104
5:45pm-5:50pm	Automated Mineral Classification from Hyperspectral Data Through Semantic Segmentation <i>Angela Rodrigues (Student)</i>	P.051
5:50pm-5:55pm	Mineralogical Tracers to Constrain the Denudation of Porphyry Copper Deposits on Sedimentary Fill on Adjacent Basins, Northern Chile <i>Héctor Pizarro</i>	P.097
5:55pm-6:00pm	First U-Pb LA-ICP-MS In Situ Dating of Supergene Copper Mineralization: Case Study in Chuquicamata Mining District, Atacama Desert, Chile <i>Zia Steven Kahou (Student)</i>	P.096
6:00pm-6:05pm	Geology, Geochemistry, and Geochronology of the Contact Copper Prospect: An Investigation of a Potential Porphyry Root, Nevada, USA <i>Zacharie Zens (Student)</i>	P.105
6:05pm-6:10pm	Tourmaline Breccia Pipes of the Giant Copper Property, Southern BC: Discerning the Significance of Tourmaline and Breccia Pipes as Vectoring Tools in Porphyry Copper Deposits <i>Bill Fischer (Student)</i>	P.103
6:00pm-7:00pm	Reception and Poster Session	

Day 2 — Wednesday, October 9, AM**Oral Session 4****Copper I****Session Chairs: Craig McEwan, Ricardo Gonzalez**8:15am-8:30am **Introduction***Ricardo Gonzalez, Craig McEwan*

8:30am-9:00am

Tops and Bottoms of Porphyry Copper Deposits, Revisited*John Dilles (Invited Speaker)*

9:00am-9:20am

Geochronology and Igneous Geochemistry of the Ferrobamba Porphyry-Skarn Deposit, Las Bambas, Southern Peru*James Cannell*

9:20am-9:40am

Characterising the Eocene-Oligocene Magmatic-Hydrothermal Evolution of the Quebrada Blanca Cu-Mo Porphyry, Collahuasi District, Chile*Regina Baumgartner*

9:40am-10:00am

The Carajás IOCG Mineral System: Diversity and Evolution Through the Archean to Paleoproterozoic*Lena Soares Monteiro*

10:00am-10:20am

Geology and Evolution of the Candelaria-Punta Del Cobre IOCG District*Irene del Real (Student)*

10:20am-11:00am Refreshment Break and Poster Viewing

11:00am-11:40am Early Mineralization with High Copper Grades in Porphyry Copper Deposits: Characteristics and Genetic and Economic Significance
John Proffett (2019 SEG Distinguished Lecturer)

11:40am-12:00pm Evolving Active Margin Magmatism, Tectonics, and Mineralization in the Northern Chilean Andes: A Short Review
Constantino Mpodozis (Invited Speaker)

12:00pm-12:20pm Regional Structural Controls on Localizing the Eocene-Oligocene Chuquicamata-El Abra-Toki Porphyry Copper Cluster, Northern Chile
Andrew Tomlinson

12:20pm-12:40pm Geological Update of the Cobre Panama Porphyry Cu-Mo-Au Project, Panama
Michael Sepp (Student)

12:40pm-1:00pm Multiphase Copper and Nickel Mineralization in the Curaçá Valley, Bahia State, Brazil
Filipe Porto

LUNCH BREAK

1:00pm-2:20pm Lunch, Networking, Poster Viewing

Day 2 — Wednesday, October 9, PM

Oral Sessions 5 and 6

Oral Session 5

Copper II

Session Chairs: Craig McEwan, Ricardo Gonzalez

Zircon Petrochronology as a Recorder of the
Magmatic Evolution Culminating in Porphyry
Copper Formation at Rio Blanco-Los Bronces

Simon J. Large

2:20pm-2:40pm

Role of Intraplate Coupling and Ridge Subduction
in the Temporal and Spatial Distribution of Au-Cu
Deposits in the Chilean Flatslab Region

Suzanne Kay

2:40pm-3:00pm

Timescales of Crustal Magmatism and Porphyry
Copper Mineralization: Large Magma Chambers
Are Essential for Massive Ore Fluid Extraction

Christoph Heinrich

3:00pm-3:20pm

Oral Session 6

Geomet

*Session Chairs: Regina Baumgartner,
Karin Olson Hoal*

Economic Geology, Geomet, and Changing the
Industry

Karin Olson Hoal

Predictive Models of Mineralogy from Whole-
Rock Assay Data: Case Study from Productora
Cu-Au-Mo Deposit, Chile

Angela Escolme

INVITED SPEAKERS

John E. Black, chief executive officer and director of Regulus Resources Inc., is an economic geologist with 35-plus years of exploration experience in the Americas, Central Asia, the Southwest Pacific, and Eastern Europe/Asia. His professional credentials include a B.Sc. degree in geology (1983) and an M.S. degree in geology/ore deposits exploration (1988), both from Stanford University. John was the founding president of Antares Minerals Inc. and was instrumental in acquiring the Haquira project in Peru for Antares. He was the key driver in negotiating the sale of Antares to First Quantum Minerals for C\$650 million. John's early career included work with Bear Creek Mining Company, Kennecott Minerals Corporation, Rio Tinto, and Western Mining Corporation, and he currently serves as the chief executive officer and director of Aldebaran Resources Inc.

Lluís Fontboté is a professor of economic geology at the University of Geneva, Switzerland, where he has been since 1990. He studied at the universities of Granada, Spain (M.Sc.), and Heidelberg, Germany (Ph.D.). His main area of expertise is epithermal polymetallic deposits linked to porphyry systems, iron oxide copper-gold deposits, and Mississippi Valley-type zinc-lead deposits. In collaboration with his students and coworkers, Lluís has also published work focusing on volcanic-hosted massive sulfide and orogenic gold deposits, on acid mining drainage, and on the future of global mineral resources. He works on mineral exploration for several commodities, mainly in the Andes.

He works on mineral exploration for several commodities, mainly in the Andes.

John M. Hanchar is a full professor, university research professor, and former head of the Department of Earth Sciences and director of the Centre for Earth Resources Research (from 2005–2012) at Memorial University of Newfoundland, St. John's, Newfoundland, Canada. His research interests are in geochemistry and include the origin, tectonic controls,

and fluid-rock alteration history of magmatic-hydrothermal low Ti magnetite-apatite (MtAp) Kiruna-type and iron oxide copper-gold (IOCG) mineral deposits and the related metamorphic alteration of their host rocks, as well as the origin and evolution of the continental crust, understood through studying granites and lower crust granulite xenoliths. To address these problems, he uses a combination of complementary analytical tools including U-Pb geochronology, tracer radiogenic isotopes (Sr, Nd, Hf, and Pb), and trace elements in accessory minerals. He is the author of over 90 papers in international peer-reviewed publications, has co-edited two books and co-authored one book, and has been an associate editor of *American Mineralogist* and *Chemical Geology*.

Doug Kirwin is an Australian geologist with 48 years of international experience. His exploration teams have been responsible for several well-known mineral discoveries, which are now being mined, the most notable being the giant Hugo Dummett gold copper deposit in Mongolia developed by Rio Tinto. He was executive vice president of

Ivanhoe Mines from 1996 to 2012. Since then Doug went back to being an independent consulting geologist. He is chairman of TSX listed Chakana Copper Corp., which is currently exploring the Soledad project in Peru, and he is a founding director of Realgold, a private Canadian company exploring the potential for Carlin-type gold deposits in the Kyrgyz Republic in central Asia. Doug has an M.Sc. degree in mineral exploration from James Cook University, where he is currently an adjunct professor of geology. He is the 2019 president for the Society of Economic Geologists.

INVITED SPEAKERS (cont.)

Constantino Mpodozis, SEG Fellow and 2000 SEG International Exchange Lecturer, obtained a B.Sc. degree at the University of Chile, Santiago, in 1974 and a Ph.D. degree in France (Paris VI University, 1977). He is a specialist in Andean tectonics and metallogenesis who worked for almost 20 years in the Chilean Geological Survey, where he

became director of geology. Following a period in the oil industry, he is currently with Antofagasta Minerals (senior exploration geologist). He is the author of more than 200 publications and conference presentations that are frequently cited in the mainstream geologic literature. He has also been a professor of structural geology, Andean geodynamics, and metallogenesis at several Chilean universities. A Guggenheim Fellow and Visiting Scientist at Cornell University, he is also a member of the Chilean Academy of Sciences and Honorary Fellow of the Geological Society of America.

John Proffett received a B.A. degree in geology from the University of California, Berkeley, and a Ph.D., also at Berkeley, working on the Yerington porphyry copper district. He worked for The Anaconda Co. for 14 years, first in the Yerington district, then in the mines at Butte, Montana, followed by explo-

ration in Alaska, focusing on volcanic massive sulfide deposits. Since 1981 he has been a consulting geologist, based in Alaska, working on a variety of ore deposits and districts worldwide. This has included porphyry deposits in Chile, Peru, Argentina, Indonesia, Namibia, Alaska, and Canada, Mt. Isa-type deposits in Australia, and massive sulfide deposits in Alaska. In 2003 he received the SEG Silver Medal and the SEG Brian Skinner Award, for a paper on the geology of the Bajo de la Alumbrera porphyry copper-gold deposit, Argentina. In 2015 he received the first Geological Mapping Award of the Geological Society of America, and he is the SEG Distinguished Lecturer for 2019.

François Robert holds a degree in geological engineering from Ecole Polytechnique in Montreal, where he also obtained M.Sc. and Ph.D. degrees. His Ph.D. studies focused on the classic orogenic Sigma gold-quartz vein system at Val d'Or, Quebec. This was followed by a postdoctorate at the University of Michigan. He joined the Geological

Survey of Canada in 1985 as a research scientist, and he carried out applied research on gold deposits in Canada and abroad. In late 1997, he joined Barrick Gold Corporation where he occupied various positions in Canada, Australia, and South America. He is currently vice president and chief geologist for global exploration. He has published numerous papers in scientific journals and served on several committees of scientific organizations, including presidency of SEG in 2015. He has received several awards, including the Lindgren, Silver Medal, and Ralph Marsden Awards from the SEG.

Richard Sillitoe graduated from the University of London, England, where he went on to obtain a Ph.D. degree. After working for the Instituto de Investigaciones Geológicas (Geological Survey of Chile) and then returning to the Royal School of Mines at the University of London as a Shell postdoctoral research fellow,

he has operated for more than 45 years as an independent consultant to more than 300 mining companies, international agencies, and foreign governments. He has worked on a wide variety of precious, base, and lithophile metal deposits and prospects in 100 countries worldwide, but he focuses primarily on the epithermal gold and porphyry copper environments. His specialty is deposit modeling using field observations and drill core. Published research has earned him awards in Europe, Australia, and North and South America, including the SGA-Newmont Gold Medal and the SEG Penrose Gold Medal. He was President of the SEG in 1999 to 2000.

Post-Conference Program

Post-Conference Field Trips

**Domeyko Fault Zone Transect:
Structural Controls of Giant
Porphyry Systems** October 11-13

Leaders: Andrew Tomlinson,
John Dilles, Nicolas Blanco

**Ore Deposits of the Maricunga Region,
Chile: From Near-Paleosurface to
Epithermal Porphyry Depths** October 11-14

Antonio Arribas, Andreas Dietrich

**A Transect Across the Andes Between
Santiago, Chile and Mendoza,
Argentina** October 12-15

Constantino Mpodozis

**Andean IOCG Deposits in the
Atacama Region** October 11-15

Irene del Real, John Thompson,
Paula Brunetto

Post-Conference Workshops

**Porphyry Copper Systems—
From Bottom to Top** October 11

Richard Sillitoe

**Orogenic Gold: Metallogeny
to Exploration** October 11

Bob Foster

**Hydrothermal Alteration Patterns in
Iron Oxide Copper-Gold Systems:
Recognition, Interpretation, and
Implications for Exploration** October 11

Robert Xavier

Imagine the Possibilities When Geoscience Meets Innovation

Posters

Posters will be on display during regular conference hours in the Pedro de Valdivia A, O'Higgins, and Prat Rooms.

Poster sessions will be held from 6 to 7pm Tuesday and Wednesday, during the evening receptions.

Titles and authors of posters are listed below. Posters for which the senior author is a student can be identified by an asterisk (*) following the poster number.

For schedule updates, please go to www.seg2019.org.

New Discoveries in South America

- P.001* **Geology of the Recently Discovered Piripiri Magmatic-Hydrothermal Iron Occurrences, Eastern of Paleozoic Parnaíba Basin, Piauí, Brazil**
Jamille V L Freire, Maria Emilia Schutesky Della Giustina, Clóvis Vaz Parente
- P.002 **New Porphyry and Skarn Discoveries in the Americas Utilising New Deep-Penetrating Imaging Technologies for Targeting under Cover**
Robert Gordon, Leduar Ramayo, Alonso Lujan
- P.003 **Characterisation and Vein Paragenesis of the Panteria Porphyry Prospect, Huancavelica, Peru**
Marco Augusto Misael Robles Ancajima, Latin American Exploration Team-First Quantum Minerals LTD.
- P.004* **Mineralogy and Geochemistry of Wolframites and Fluid Inclusion Petrography in Quartz from the Vein-Like Deposit of W-Au from Taraira, Vaupés Colombian Amazony**
Milton Alfonso Santos, Thomas Cramer, Ivan Felipe Pacheco

- P.005 **Rare Earth Mineral Occurrences in Uranium-Barren Albitites in Center of the Lagoa Real Uranium Province, Brazil**
Jefferson Ferreira da Silva, Frederico Sousa Guimarães, Lucilia Aparecida Ramos de Oliveira, Lucas Eustáquio Dias Amorim, Tiago Henrique Ferreira de Jesus, Camila Marques dos Santos, Tércio Assunção Pedrosa, Mônica Elizetti Freitas, Evandro Carele de Matos, Francisco Javier Rios
- P.006 **Discovering Mineralization below the Atacama Gravels with Strategic Sampling of Discrete Salt-Rich Pockets along Structures**
Peter A Winterburn, *Alexandra E Brown*

Gold Deposits – South America

- P.007* **Gold Re Concentration by High-Temperature Sulfide Recrystallization Supported by Re-Os Reset Ages: A New Mineralization Style for the Quadrilátero Ferrífero Area, Brazil**
Mariana Brando Soares, Atlas Vasconcelos Corrêa Neto, Wendell Fabricio-Silva, Felipe Emerson André Alves
- P.008* **Boiling Horizon Determination at Dios Protege Vein, Castaño Nuevo Mining District, Cordillera Frontal, Argentina**
María Agustina Cocola, María Celeste D'Annunzio, Leonardo Strazzere, Diego Guido
- P.009 **Gold Resource Distribution of South America**
Emily M Beard, Simon Jowitt
- P.010* **Structural and Lithological Controls and Mineralization of the Carbon-Rich Sedimentary Rock-Hosted Epithermal Shahuindo Deposit (Cajamarca, Peru)**
Brigitte Berna Rumiche, Jean Vallance, Macneill Balboa, Omar Cabrera, Camille Baya, Patrice Baby, Gleb S. Pokrovski

- P.011 **La Falda Project: Northern Extension of the Middle Miocene Au-Cu Porphyry Subbelt, Maricunga Belt, Chile**
Luciano Maias Bocanegra, Juan Francisco Burlando
- P.012* **Crustal Evolution in the Southern Goiás Archean Block: Evidence from In Situ U-Pb and Hf-O Isotopes**
Jessica Bogossian, Anthony Kemp, Steffen Gerd Hagemann
- P.013* **High-Resolution X-Ray Computed Tomography Studies of Gold-Bearing Quartz-Carbonate Veins Hosted in the Lower Metamafic Unit at the World-Class Cuiabá Deposit, Brazil**
Marília Ferraz, J. Richard Kyle, Lydia M. Lobato, Richard A. Ketcham, André L.A. Vitorino, Rosaline C. Figueiredo e Silva
- P.014 **Cerro Choique: A Multiepisodic Shallow Epithermal System, Somún Curá Massif, Patagonia, Argentina**
Daniel Hughes, Sebastian M Jovic, Diego M Guido
- P.015 **Geology, Geochemistry, and Mineralogy of the Overman Gold Deposit in the Paleoproterozoic Greenstone Belt of Suriname, South America**
Nicole M.E. Kioe-A-Sen, Manfred J. van Bergen, Ravi Schreefel, Pieter Z. Vroon, Paul Mason
- P.016 **Structural Controls on Gold Mineralization in the San Ramon Shear Zone, Antioquia, Colombia**
Stefan Kruse
- P.017* **Fluid Inclusion Studies in Quartz-Calcite Veins Hosted in Metamafic Dikes from Laranjeiras, Córrego do Sítio Gold Lineament, Quadrilátero Ferrífero, Minas Gerais, Brazil**
Júlia Mattioli Rolim, Rosaline C. Figueiredo e Silva, Matheus Luís de Sales Oliveira, Yuri Ribeiro, Lydia M. Lobato

- P.018 **Distribution of the Hydrothermal Alteration at the Guanaco Au-Cu District Mine, Northern Chile**
Conrado Permuy Vidal, Gerardo Nestor Páez, Matías Galina, Sebastián Miguel Jovic, Diego Martín Guido, Pilar Moreira, Luciano López
- P.019* **The Historical Veloso Gold Mine, Quadrilátero Ferrífero, Minas Gerais, Brazil**
Júlia Souza Pimenta, Alexandre Raphael Cabral, Gláucia Nascimento Queiroga
- P.020 **Using Pyrite to Fingerprint Ore-Forming Processes and Vector Toward Mineralization**
Martin Reich
- P.021 **Geology of the Calcatreu Low-Sulfidation Gold Deposit, Patagonia, Argentina**
Walter Soechting

- P.022* **Mineral Chemistry of Hydrothermal Rutile from Basilio and Pe Quente Gold Deposits, Eastern Sector of Alta Floresta Gold Province (Mt), South of Amazon Craton**
Ivan Roberto de Souza, Rafael Rodrigues de Assis, George Luiz Luvizotto
- P.023* **Multielement Analyses of Mineralized Samples from the Turmalina Gold Deposit: General Trends Between Gold and Trace Elements as a Tool for Prospectivity and Geometallurgy**
Felipe Emerson Alves, Atlas Vasconcelos Corrêa Neto, Mariana Brando Soares, *Ana Clara Varca Pinheiro*, Guido Monteiro de Albuquerque, Piero A. Berquó de Sampaio, Victor Diniz Silveira
- P.024 **The Formation of High-Grade Gold Polymetallic Intermediate-Sulfidation Epithermal Veins in Santander and Bolivar Provinces, Colombia**
Jocelyn Josh Pelletier
- P.025 **Marmato Gold Deposit, Colombia: A Hybrid Between a Porphyry and a Reduced Intrusion-Related Gold System**
Leonardo Santacruz, Stewart Redwood, Julian Ceballos, Massimo Matteini, Nilson Botelho, Alessandro Cecchi, Juan Carlos Molano

Gold Deposits – Other Regions

- P.026* **Preliminary Results on Primary Gold Deposition in Pan-African Rocks of Central Africa (Eastern Cameroon)**
Kevin Igor Azeuda Ndonfack, Yuling Xie
- P.027* **Trace Element Composition Variation in Pyrite from Carlin-Type, Epithermal, Orogenic, and Porphyry Deposits: A Review from Recent Publications >2007**
Lebogang Babedi, Bjorn von der Heyden

- P.028 **Fluid Geochemistry of the Bangbu Orogenic Gold Deposit, Southern Tibet, China: Constraints from Microthermometry and LA-ICP-MS Fluid Inclusion Microanalysis**
Hongjun Chen, Xiaoming Sun, Dengfeng Li, Qiaofen Liu
- P.029 **Petrographic and Fluid Inclusion Studies of the Dongping Gold Deposit in Hebei Province, China, and a Comparison with Orogenic Gold Deposits**
Haixia Chu, Jiuhua Xu, Chunji Xue, Guorui Zhang
- P.030* **Trace Element and Multiple Sulfur Isotope Signatures of Pyrite Reveal Mantle and Crustal Source Interaction in the Golden Mile-Mt. Charlotte Deposit, Western Australia**
Marcelo Godefroy Rodriguez, Steffen Hagemann
- P.031* **Short-Wave Infrared (SWIR) Hyperspectral Characterization of Alteration at the Sadiola Hill Gold Deposit, Mali, Western Africa**
Semyon Martynenko, Frank van Ruitenbeek, Pekka Tuisku, Kim Hein
- P.032 **Colloidal Transport: A Solution to the High-Grade Gold Ore Paradox?**
Duncan F. McLeish, Anthony E. Williams-Jones, Olga V. Vasyukova, James R. Clark, Warwick S. Board

- P.033 **Birimian Gold Mineralization and the Occurrence of Tarkwaian Rocks from the Julie Belt, NW Ghana**
Samuel Nunoo, Jan Kramers, Axel Hofmann
- P.034* **The Giant Zaozigou Au-Sb Deposit, West Qinling Gold Province, China: Intrusion-Related or Orogenic?**
Kunfeng Qiu, Jun Deng, Haocheng Yu, Duncan McIntire, Zhaoshan Chang, Richard J. Goldfarb
- P.035 **High- and Intermediate-Sulfidation Mineralization in the Carmen Quartz-Pyrite-Gold (QPG) Deposit, Mankayan District, Northern Luzon, Philippines**
Yi Sun, Leonardo L. Subang, Lejun Zhang, Angela Escolme, David R. Cooke, Jing Chen
- P.036 **Ages and Sources of the Shear Zone-Hosted Taldybulak Levoberezhny Gold Deposit, Tien Shan, Kyrgyzstan**
Xiaobo Zhao, Chunji Xue, Nikolay Pak
- P.037* **The Emigrant Pass Volcanic Field: Petrologic Constraints on Magmas That May Have Contributed to Eocene Mineralization along the Carlin Trend**
Nansen Herman Olson, John H Dilles, Christopher D Henry
- P.038* **Ore and Breccia Classification of the GW Orebodies of the Balatoc Diatreme, Acupan Gold Deposit, Philippines**
Acer Jian Figueroa, Jillian Aira Gabo-Ratio, Ryohei Takahashi, Aljess Ramos

The logo for HUBBAY, featuring the word "HUBBAY" in a bold, black, sans-serif font. The letter "H" is stylized with a white shape inside it, resembling a drop or a stylized 'U'. The logo is centered on a light gray rectangular background.

Methods and General Metallogenic Concepts for PCD and Other Deposits

- P.039 **Rhenium and Osmium Isotope Zoning: Implications for the Use of Molybdenite as a Single Mineral Geochronometer**
Fernando Barra, Artur Deditius, Martin Reich, Matt R Kilburn, Paul Guagliardo, Malcolm P Roberts
- P.040 **Developing the Structural Model: A New Approach to an Age-Old Problem**
Cameron Bartsch, Tony Gilman
- P.041 **Apatite and Titanite Characteristics of Porphyry Fertile Plutons**
Farhad Bouzari, Craig J.R. Hart, Thomas Bissig, Guillaume Lesage
- P.042* **Geochemical Discrimination of Igneous Zircon Associated with Iron Oxide Copper-Gold Alteration**
Adrienne Brotodewo, Caroline Tiddy, Diana Plavsá, Adrian Fabris, David Giles
- P.043 **Application of Singular Value Decomposition (SVD) to the Extraction of Gravity Anomalies Associated with Mineralisation Within the Bozhushan Ore Field, Southwestern China**
Yongqing Chen, Lingfen Guo, Binbin Zhao

RioTinto

Discover the job,
the challenge

For 140 years, we've been discovering safer, more effective and more sustainable ways to find mine and process the minerals and metals essential for everyday life.

Our vision is to be a company that is admired and respected for delivering superior value, as the industry's most trusted partner. Our operations give us the opportunity to create mutual benefit with the communities, regions and countries in which we work.

Using the latest in technology and innovation, Rio Tinto Exploration is focused on smarter ways to find the mines of tomorrow.

We are currently seeking high quality opportunities to add to our growing exploration portfolio.

7 different commodities explored across 17 countries.

SEG 2020 Vision: Celebrating a Century of Discovery

Whistler, BC, Canada • September 12–19, 2020

CALL FOR PAPERS

Abstracts Deadline: March 31, 2020

Plan to attend a grand celebration in Whistler, British Columbia, for SEG's 100th anniversary. We will showcase the scientific accomplishments and mineral discoveries that have defined the past 100 years and the new science, technology, and thinking that will guide us into the next century. Be with us to forge the future as we build on past successes!

The technical program will evolve around six major themes:

- ***Game Changers: The First Hundred Years***
- ***Lindgren's Legacy: Ore Deposits in Depth***
- ***Gold 2020: Golden Past, Precious Future***
- ***Basins Through Time:
Linking Process and Ore Systems***
- ***Ore Deposit Structure:
Processes, Patterns, and Innovations***
- ***2020 Vision: The Next Hundred Years***

Welcome to Whistler!

Join us at the Whistler Conference Centre to learn, discuss, and inspire. We will host the global mineral exploration community, including industry, academia, government, early career professionals, and students, to a program of exceptional technical sessions and posters, field trips, and workshops in this world-class resort and spectacular mountain setting.

Be sure to mark this one on your calendar for 2020!

Gerry Carlson, *Pacific Ridge Exploration, SEG 2020 Chair*
Brian Hoal, *Executive Director, Society of Economic Geologists*
